

TSHUDUFHADZO THEMBA

JUNIOR APPLICATIONS DEVELOPER

PERSONAL PROFILE

I am a results-driven Junior Application Developer with a strong academic foundation in software engineering and systems design. Having maintained consistent performance in core technical modules—including Programming (Java/C#), Network Engineering, and Database Management—I possess a solid understanding of the software development lifecycle. I am a self-motivated problem solver and team player, eager to apply my proficiency in programming logic and modern IT practices to deliver high-performance solutions..

AREAS OF EXPERTISE

Software Development : Proficiency in Programming Logic and Design, and Object-Oriented Programming (Java/C#).

Systems & Infrastructure : Knowledge of Network Engineering and IT Professional Practice.

Database Management : Skilled in Database Design and Database Implementation.

Technical Analysis : Competent in Mathematical Principles for Computer Science and Applied Communication

Languages : Tshivenda (Home Language), English, IsiZulu, Setswana, IsiXhosa, and Tsonga.
